Jericho De Leon Bermas

Full Stack Engineer · AI & Automation

Laguna, Philippines • +63 917 113 5133 • jecho.deleon@gmail.com • linkedin.com/in/jerichobermas • github.com/aslaii

Full stack engineer (TypeScript, React/Next.js, NestJS) with 4 years building web and mobile products for startups, agencies and remote clients. Currently building a production multi-agent AI platform with tool-calling orchestration, sandboxed code execution and automated app provisioning. Previously cut legal document prep time by 70% with LLM automation.

SKILLS

Languages	TypeScript, JavaScript, PHP, Python, SQL
Frontend	React, Next.js, React Native, Vue, Angular
Backend	NestJS, Node.js, Laravel, CodeIgniter, Flask
Data	PostgreSQL (Neon, Supabase), Firebase
Testing	Jest, Vitest, Playwright
Cloud & DevOps	GCP (Cloud Run), Cloudflare, Docker, GitHub Actions (CI/CD)
AI & LLM	OpenAI, Claude, Gemini, Vercel AI SDK, Claude Agent SDK
AI Engineering	Multi-agent systems, tool calling, structured outputs, streaming, RAG, embeddings, evals, prompt engineering
Automation	n8n, Zapier, ActiveCampaign, Twilio, BrowserStack, Serper

EXPERIENCE

Full Stack Software Engineer · Mobii Digital Inc. · Contract, Remote — Feb 2026 – Present

- Built the **multi-agent system** behind Gondoor (gondoor.app), an AI platform that helps users launch and run a business from a chat. Stack: TypeScript, NestJS (backend and all agents), Next.js, OpenAI and Claude models via Vercel AI SDK and Claude Agent SDK.
- **CEO Agent**: orchestrator the user chats with; routes tasks to specialist agents via tool calling and runs a Council of founder-persona agents that critiques the user's idea.
- **Engineering Agent**: turns a request into code changes for web apps, SaaS and e-commerce sites, runs them in isolated sandboxes and pushes them to GitHub; **load-tested to 100 concurrent users**.
- **App provisioning**: one request creates a Neon PostgreSQL database, a GitHub repo and a Cloudflare domain, so users get a live, working link without touching code.
- **Content Agent**: pipeline that generates marketing videos and posters and auto-posts them to X, TikTok, Facebook and LinkedIn.
- **Research, Browser and Growth Agents**: market research synthesis via Serper, automated form filling in BrowserStack browser sessions and business reviews that recommend next steps and trigger posts or research.

Full Stack & Automations Engineer · GOOSELAW Immigration Law Firm · Remote — Sep 2025 – Jan 2026

- Built an n8n pipeline using OpenAI and Gemini that drafts immigration legal letters (visa, LMIA, H&C), **cutting document prep time by 70%**; tuned prompts and system instructions so output met strict submission formatting.
- Introduced the firm's **first version control** and GitHub Actions CI/CD (tests, deploys to Cloud Run), replacing manual live edits.
- Built a client questionnaire app (Next.js, Firebase) with real-time validation, progress saving and secure uploads.
- Migrated legacy Cloud Functions from 1st to 2nd gen and retired outdated functions, cutting costly runs.
- Ran IT for 15+ staff (Google Admin, Microsoft 365, 1Password, Adobe): onboarding, security and how-to guides.

Full Stack Developer · Seafair Cruises LLC / Expoships LLLP · Contract, Remote — Jun 2025 – Sep 2025

- Shipped features and bug fixes across the frontend and backend of a monolithic production web app (Next.js, Supabase).
- Helped design and normalize Supabase (PostgreSQL) database schemas.
- Set up a GitHub Actions workflow that streamlined deployments.

Full Stack Engineer · JLabs Innovatech Inc. · Remote — Jan 2024 – Jun 2025

- Built features across **7 client web and mobile products** using React, React Native, NestJS and Laravel.
- **WSG Energy Services** (web app): core developer on a from-scratch build (CRUD modules, complex UI, PDF canvas tagging).
- **Resqyou** (legal ticketing platform): built e-signature and PDF export for lawyers handling violation tickets online.
- **VuBlox** (sports hub): built an event timeline, invites and age-based moderation that hides violent content from minors.

Junior Full Stack Developer · Baytech BPO Corporation · On-site — Jan 2023 – Jan 2024

- Built features for PDF-fill, e-signature and AI SaaS products (Vue, React, Angular, Laravel, CodeIgniter).
- **PDFRun** (PDF-fill site): built wizard features (preview, custom fields, payment) and per-customer feature flags.
- **AvatarMaker & ChatPDF** (AI image and PDF chat apps): built trial usage metering and the paywall (Python, Docker).

Software Engineering Intern · Supafaya Pte. Ltd. · Remote — Oct 2022 – Jan 2023

- Proposed in month one and **led the Create React App to Vite migration**, fixing slow builds.
- Built user permissions, the homepage, and sales and logistics modules (React, Firebase).

EDUCATION & TRAINING

B.S. Computer Engineering · Mapúa Malayan Colleges Laguna — 2022

Capstone: KALAT, waste collection monitoring and route optimization for Calamba City (Arduino, Next.js, Node.js, Flask).

Training: Full Stack Open, University of Helsinki — 2022

Training: CCNA coursework, Cisco Networking Academy — 2020
